Source: Table prepared by the Congressional Research Service on September 8, 2014, for the 2014 version of the House Ways and Means Committee Green Book. Table based on data from the U.S. Department of Labor, Bureau of Labor Statistics. For years prior to 2002, data come from previous editions of the Green Book. For 2002 forward, data are from annual editions of *Women in the Labor Force: A Databook*, published by the Department of Labor. 2012 data are from Table 6 of the 2013 edition, which is available online at <http://www.bls.gov/cps/wlf-databook-2013.pdf#page=20>.

Notes: Data for 1994 and beyond are not directly comparable with data for 1993 and earlier years because of introduction of a major redesign in the Current Population Survey (household survey) questionnaire and collection methodology and the introduction of 1990 census-based population controls, adjusted for the estimated undercount (Polivka & Rothgeb, 1993).

a. This category includes never-married, divorced, separated, and widowed persons.
